

OFFER YOUR GUESTS HIGH SPEED WIRELESS INTERNET AND LET WHOTSPOT TAKE CARE OF IT ALL FOR YOU.

Instant set-up of worry-free, WiFi service for your location. The solution is loaded with customized features and is the most feature rich, straight forward, plug-n-play Hotspot kit.

- **Plug-n-play:** Simply plug your preconfigured WHOTSPOT WiFi Gateway into your Internet connection - even behind firewalls. The hotspot will begin working immediately.
- **Easy to use:** We've made it simple. No experience required.
- **Transparent:** The Whotspot hotspot functions entirely in the background while you run your business.
- **Security:** All users must register before gaining access to your network. Offer Free or Paid internet access.
- **Versatility:** We can switch your location from No-Charge free access to Revenue Generating upon request. We can Process Credit Cards or Pre-paid SurfCards. No Merchant Account required! We handle it all.
- **Target Marketing:** All users submit their email address. Targeted promotions and specials can be sent to all users of your Hotspot.
- **Customized Welcome Page:** your WiFi Gateway will have a customized welcome page/home page for all your visitors to see. This page serves to identify that your customers are accessing the internet at your location. You can use this to announce seasonal specials and promotions.
- **Customized THANK YOU Page:** Your visitors will be directed to a customized Thank-You page. Use this for additional messages or advertising opportunities.
- **Promote:** Add your location to online directories of WiFi locations. We'll help.

THE MOST FEATURE RICH, PLUG-N-PLAY WIRELESS HOTSPOT

Motels, Bed and Breakfast and Hostels are frequented by tourists and students. These groups all have a desire to keep in touch with family and friends. In addition, the latest boom in digital cameras has created a demand for internet access to enable photographers to upload their pictures while on the road.

Imagine your customers conveniently checking their email, contacting their office, clients, conducting business, chatting with friends and family, checking the traffic, weather and reading their local newspaper online from the comfort of their room.

Your customers can surf using their WiFi enabled laptop, WiFi Phones, or PDA's. You can make 300% or more profit.

The expectations of customers are high. Travelers, businesses, students, and even trades people need to stay in touch on a regular basis - even while on vacation! Offering WiFi gives them an extra reason to patronize your business and a reason to stay and spend more.

WHOTSPOT technology can also be used to communicate special offers to customers in your business location, and to make them aware of special menu items and entertainment schedules. Patrons can use WHOTSPOT to play online games, browse, send and receive email and even keep in touch with their office. Each WHOTSPOT location can be remotely monitored and can offer a combination of free and paid access.

Well, the folks at Whotspot have made it easy to get started. Whotspot manages it all for you!

Whotspot offers this completely managed solution and includes equipment, technical support, management and billing. Our WiFi Kit is preconfigured with your custom home page and ready to accept prepaid SurfCards or credit cards instantly.

Your customers are happier. You make more profit. What could be better?
