into the WiFi business

WiFi HOTSPOT Managed Services, Plug'n Play Equipment, Support, Accept Prepaid Cards and Credit Cards

FOR IMMEDIATE RELEASE:

WHOTSPOT ANNOUNCES NEW INTERNET CONTENT FILTERING SERVICE - PROTECTSPOT

Montreal, Canada (PRWEB) April 23, 2007 -- WHOTSPOT, a leading WiFi Hotspot management service, announces its new ProtectSpot Managed Service - a complete Internet filtering, content filtering and monitoring solution. ProtectSpot can be used standalone with any broadband internet connection, or with a WhotSpot WiFi gateway - in your home, office, business, library, school or any location where content filtering is desired. Completely plug and play, it's preconfigured and managed by WhotSpot - just plug it in and say goodbye to unwanted content!

Traditional solutions usually involve complex and expensive hardware that is difficult to setup. Many require the installation of software clients on each computer accessing the net. ProtectSpot is preconfigured for each customer before shipping and then simply plugs right into your existing broadband connection. 82 Standard categories of filter can be applied, along with customized setting at each location. No software to install. Unlimited client support. Amazing low-cost monthly service.

WhotSpot prices this service with a one-time initial setup fee of \$199, including the hardware and filter configuration, and a monthly monitoring fee of \$25, which includes continual filter database updates and blocking /unblocking of individual sites as requested by the customer.

For Schools, Education: Protecting students from accessing inappropriate content is the ultimate concern of any educator. For Business: Protecting your employees from accessing inappropriate content is the concern of any business. In addition, lost employee productivity can be minimized with our simple content filtering service. For Public Access Locations, Hotspots & Internet Cafes: Protecting children, students and others from viewing or accessing inappropriate content is the ultimate concern of any public venue owner.

Key Features: HASSLE-FREE MANAGEMENT AND 24/7 MONITORING; A reliable, and up-to-date Content Filtering database protects your users from inappropriate content and unsavory sites; Fast - Will not slow down Internet speed! Accurate - Automated updates, with no bothersome list downloads like other filters. Professional libraries developed with advanced technology and human review, are located at secure, regional data centers; Application Control allows you to define software usage, like instant messaging, and even control what applications are downloaded; In addition to web sites, block streaming media and many file types to conserve bandwidth; Protects all computers that connect through your gateway; No software to install, everything is preconfigured by us; Low-cost, robust protection.

About WHOTSPOT

Since 2001, Whotspot has been providing "One-Stop" products and services for public internet access. We take care of the end-to-end process of creating, maintaining and profiting from a "WiFi Internet Hotspot".
